

Manitowoc County Health Data Report

A summary of secondary data sources

2022

CUPH

Center for Urban
Population Health

*Data-driven. Evidence-based.
Community-engaged.*

This report was prepared by Carrie Stehman, MA and David Frazer, MPH from the Center for Urban Population Health, a partnership of Aurora Health Care/Aurora Research Institute, LLC, the University of Wisconsin-Milwaukee, and the University of Wisconsin School of Medicine and Public Health.

The funding to prepare this report comes from the Manitowoc County Health Department, Aurora Health Care, Holy Family Memorial in affiliation with Froedtert & the Medical College of Wisconsin, and Lakeshore Community Health Care.

Table of Contents

Top Five Health Issues and COVID-19 Summary Charts	1
Total Population	6
Demographics	7
Population Change in Race and Ethnicity	8
Population Change in Age	9
Poverty	10
All Births	11
Percent Births Receiving First Trimester Prenatal Care	12
Percent Births Receiving Late or No Prenatal Care	13
Tobacco Use During Pregnancy	14
Low Birth Weight	15
Infant Mortality	16
Premature Births	17
Birth Rate Ages 15-19	18
Birth Rate Ages 15-17	19
Number of Deaths and Mortality Rate	20
Years of Potential Life Lost (YPLL)	21
Age-Adjusted Mortality Rate	22
Average Age at Death	23
Number and Rate of Injury Deaths	24
Number and Rate of Suicides	25
Number and Rate of Injury Hospitalizations	26
Number and Rate of Opioid-Related Hospital Encounters	27
Age-Adjusted Rate of Opioid-Related Hospital Encounters	28
Number and Rate of Opioid Deaths	29
Age-Adjusted Opioid Mortality Rate	30
Number and Rate of ED Visits for Injury	31
Ranked Causes of ED Visit for Injury- Count	32
Sex Offense Rates	33
Child Abuse	34
Sexually Transmitted Diseases	35
HIV Incidence	36
Cancer Incidence	37
Cancer Incidence and Mortality Rates by Site	38
Cerebrovascular Disease Deaths	39
Health Behaviors from Behavioral Risk Factors Surveillance Survey	40
COVID-19 Cases and Deaths to Date	41
Manitowoc County Health Rankings	42

Notes:

In 2022, the Center for Urban Population Health was enlisted to create a report detailing the health of Manitowoc County using secondary data. This health data report is one piece of a variety of data sources being used by local health systems to describe their communities and the health priorities of their service areas. Indicators for which primary data are being collected were excluded from this report. In addition, rather than repurposing data from the comprehensive county rankings report created by the University of Wisconsin Population Health Institute (2022), the county level data from the rankings report is included in its entirety at the end of this report.

All of the data used in this report come from publicly available data sources. Data for each indicator were presented by race and ethnicity and gender when the data were available. Race data categorized as 'unknown' or 'missing' were rarely included in this report. Therefore, not all races are represented in the data that follow.

In some cases data were not presented by the system from which they were pulled due to their internal confidentiality policies which specify that data will not be released when the number is less than five. In other cases, data were available, but the rates or percentages are not presented in this report. This is due to the indicator having small numbers in the numerator or denominator resulting in rates or percentages that were subject to large year to year fluctuations and, as such, would not have provided a meaningful representation of the data for the population subset.

When applicable, Healthy People 2030 objectives are provided for each indicator. These objectives were not included unless the indicator directly matched with a Healthy People 2030 objective.

The charts and graphics used to summarize the key stakeholder top five health condition and behavior issues were created in Metopio. Access to Metopio data was provided by Advocate Aurora Health Care. The charts and graphics utilized publicly available data.

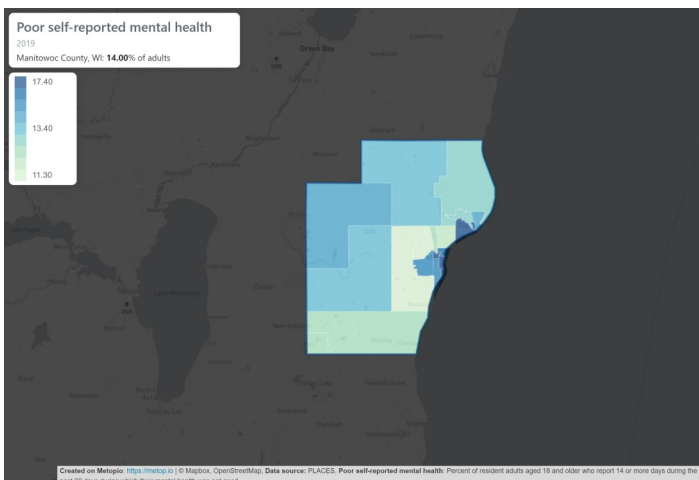

University of Wisconsin Population Health Institute. *County Health Rankings 2022*. Accessible at www.countyhealthrankings.org.

The five health issues ranked most consistently as top five health issues for the County by the key stakeholder interviews were:

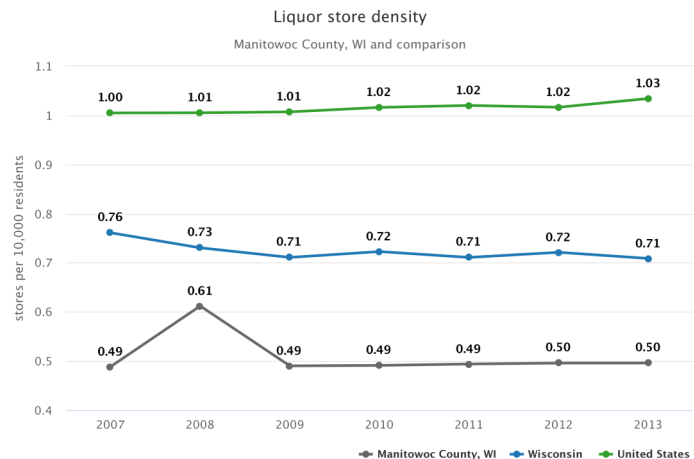

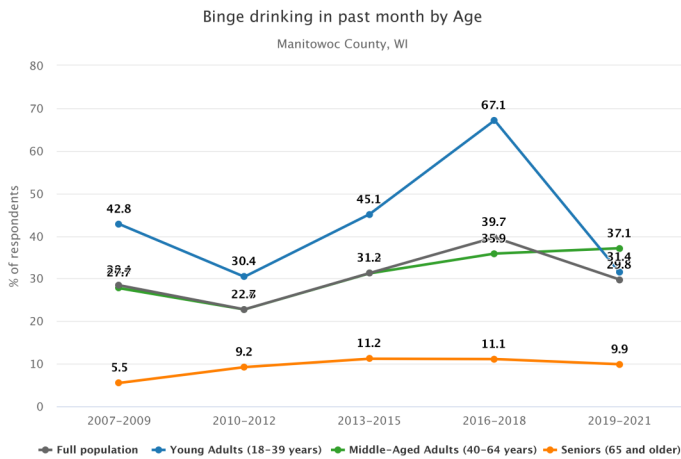

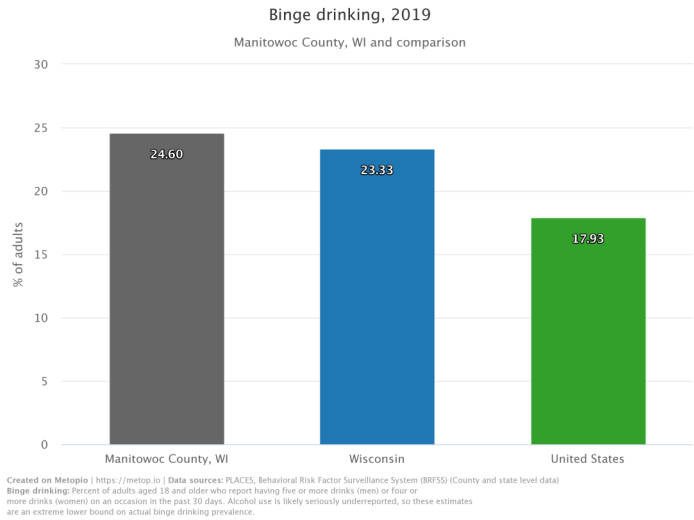

1. Mental Health
2. Alcohol Substance Use
3. Nutrition, Physical Activity, and Obesity
4. Intimate Partner / Domestic Violence
5. Oral Health

The following graphics and charts provide a visual representation of these top issues.

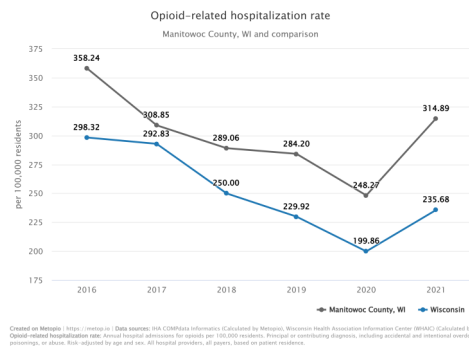

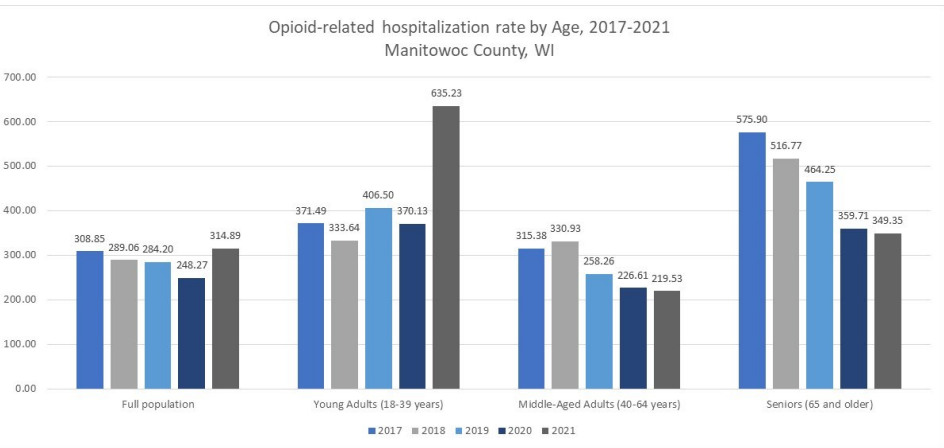

Mental Health

Alcohol Use

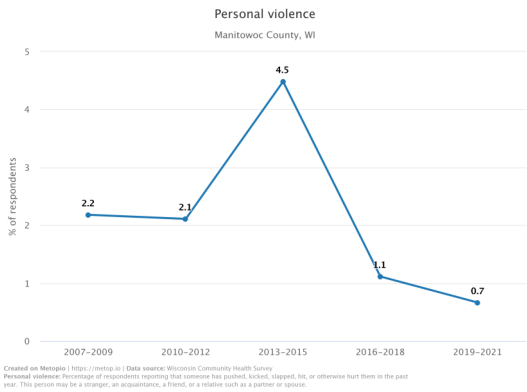

Substance Use

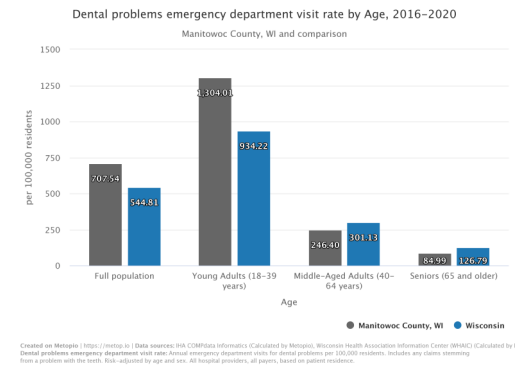

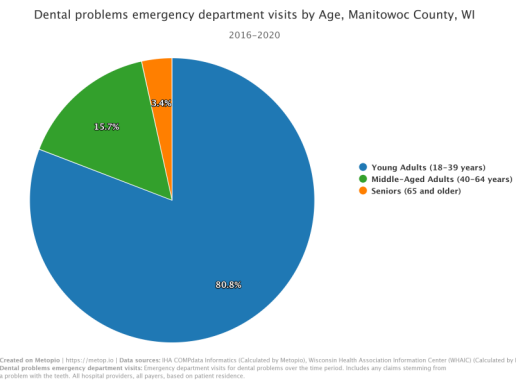

Nutrition, Physical Activity, and Obesity

Intimate Partner / Domestic Violence

Oral Health

COVID-19

Number of reported confirmed and probable COVID-19 cases by date of symptom onset or diagnosis:

Manitowoc County

Updated: 4/26/2022 (Total: 20,537)

The most recent two weeks are preliminary and subject to change as more data are submitted (from 4/12/2022 to 4/26/2022)

Vaccine doses for Manitowoc County residents by week

(Total: 119,692)

*Current week may be incomplete.

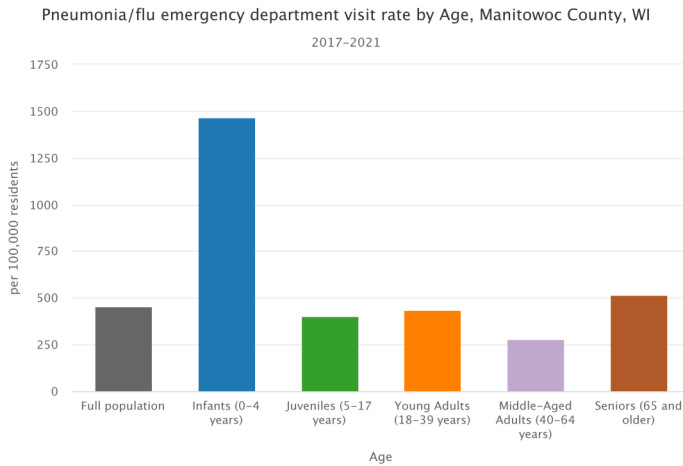

Immunizations

Created on Metopio | <https://metop.io> | Data source: Wisconsin Community Health Survey
Has received flu vaccine: Percentage of respondents reporting that they have had a flu shot or flu vaccine in the past year.

Created on Metopio | <https://metop.io> | Data source: Department of Health and Human Services (HHS) (Retrieved via the API documented at <https://www.hhs.gov/mipo/about/reso>)
Medicare flu vaccination rate: Percent of Medicare fee-for-service beneficiaries receiving the flu vaccine at any point during the year, as determined from claims. All ages. Equivalent to FLW and FLV extended out to 52 weeks.

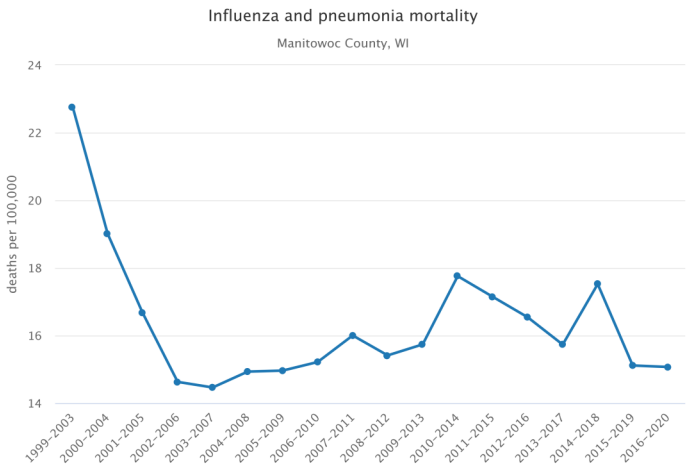

Created on Metopio | <https://metop.io> | Data sources: IHA COMPIdata Informatics (Calculated by Metopio), Wisconsin Health Association Information Center (WHAIC) (Calculated by I)
Pneumonia/flu emergency department visit rate: Annual emergency department visits for pneumonia or influenza per 100,000 residents. Risk-adjusted by age and sex. All hospital providers, all payers, based on patient residence.

Created on Metopio | <https://metop.io> | Data sources: IHA COMPIdata Informatics (Calculated by Metopio), Wisconsin Health Association Information Center (WHAIC) (Calculated by I)
Pneumonia/flu hospitalization rate: Annual hospital admissions for pneumonia or influenza per 100,000 residents. Risk-adjusted by age and sex. All hospital providers, all payers, based on patient residence.

Created on Metopio | <https://metop.io> | Data source: Behavioral Risk Factor Surveillance System (BRFSS)
Pneumococcal vaccination: Percent of resident adults aged 65 and older who report having had a pneumococcal vaccine (pneumonia shot).

Created on Metopio | <https://metop.io> | Data source: National Vital Statistics System-Mortality (NVSS-M) (CDC Wonder)
Influenza and pneumonia mortality: Deaths per 100,000 residents due to influenza and pneumonia. These diseases are frequent causes of death especially among the elderly because they spread widely and tend to be complications from other conditions. The flu can change quite a bit from one year to another, affecting which populations are most vulnerable to it. Age-adjusted.
