NICOTINE AND VAPE DEVICES

SOURIN
Small reusable vape device that is commonly used for its small discreet look.

NICOTINE POUCHES
Disposal synthetic nicotine pouches can be mistaken for some mint containers.

JUUL: Juuls can also be mistaken for flash drives. Commonly used vape device that can be easily hidden and discreetly used with its fruity smell and flavoring.

BUT SOME OF THESE AREN'T WHAT THEY SEEM!

THC PRODUCTS

DELTA-8 GUMMIES

Delta-8 is a THC derivative that has the same psychoactive effects as delta-9 and delta-10; these can be mistaken for regular candy and should always be stored in its original packaging.

GRINDER

To use a pipe the flower or bud need to be ground into small pieces for the THC to have its intended effect. This device can sometimes be mistaken for a lip balm, lotion, or a small speaker. If you open the top you can see that this is a grinder. Used to prep cannabis buds to be smoked. It can also be used for storage.

THC PEN

THC pen device used specifically for THC products you can always determine it is THC by the amber color of the solution.

CIGARILLO

Swisher sweet this is also another tobacco product that youth also will open and either replace some or all of the tobacco with marijuana bud to make a blunt.

VAPE

This tobacco product is commonly known as a Vaporlax or Posh these are commonly used vapes for their small discreet and fruity taste and smells

HIGHLIGHTER

A secret pipe that is used to smoke cannabis flowers. The highlighter can store the pipe.
